

Lease Management System

Transform Lease Management Across Your Portfolio

Centralize documents, automate lease abstraction, and gain real-time visibility into critical lease data all in one platform.

Time savings

Risk reduction

Visibility across portfolios

NOI impact

Workflow

- Streamline lease operations with structured, end-to-end workflows
- Eliminate delays with automated approvals, alerts, and task routing
- Keep teams aligned with built-in collaboration and accountability

Data Connectivity

- Instantly search and access leases across your entire portfolio
- Control and secure user access with confidence
- Seamlessly share data with internal teams and external stakeholders

Lease (Abstraction)

- Cut abstraction time with AI-powered lease extraction
- Find any lease, clause, or document in seconds
- Ensure consistency with configurable, audit-ready templates

Document Storage

- Automatically generate tables of contents for every document
- Organize leases to match your portfolio structure
- Centralize and control documents with version tracking

Abstract Automation

- Deliver client-ready abstracts in a fraction of the time
- Maintain full transparency with built-in audit trails
- Access critical data instantly—from documents, search, or reports

Reporting

- Generate powerful reports in seconds, not hours
- Customize and export data for deeper insights
- Track critical financial metrics and key lease dates

Metrics/ROI

Reduce lease abstraction time by 50–70%

Cut document retrieval time from hours to seconds
